SUMMARY

Azure-focused engineer with 4+ years at Tata Consultancy Services building production systems for Meijer, a top-10 US grocery retailer. Specializes in Python automation, AI-powered developer tooling, and cloud-native event-driven pipelines. Currently shipping AppInsights Copilot, a zero-dependency Windows EXE bundling 116 MCP diagnostic tools for natural-language incident investigation via VS Code Agent Mode and GitHub Copilot. Proven track record of eliminating manual toil through automation and delivering tools that non-technical teams can use independently.

TECHNICAL SKILLS

Cloud & Azure:	Azure Durable Functions, Logic Apps, Cosmos DB, App Insights, KQL, Service Bus, Azure Storage, Azure Monitor SDK
AI & Gen AI:	MCP Server Design, Agentic Loops, LLM Tool-Calling, SSE Streaming, GitHub Models API, GPT-4o, Ollama, VS Code Agent Mode
Python:	FastAPI, PyInstaller, Tkinter, PyQt, Kafka Consumer, pystray, Structured Logging, Automatic Retries, REST APIs
Languages:	Python, Java, JavaScript, SQL, KQL
Data & Analytics:	Power BI, DuckDB, SQLite, MySQL, NSE/BSE APIs, AMFI, Azure Storage Explorer
Front-End:	Vanilla JS, Canvas API, HTML, CSS, Real-Time Charting
Enterprise & Ops:	SAP Hybris, AEM, Apache Kafka, Agile/Scrum, Jira, Git, Eclipse, PyCharm, IntelliJ, Visual Studio

WORK EXPERIENCE

IT Analyst | Tata Consultancy Services *Jan 2025 – Present*

Client: Meijer, Grand Rapids, MI · Bengaluru, Karnataka

- Lead Python and Azure engineer on a high-traffic retail automation program, designing and delivering tools used daily by operations and support teams, reducing manual effort by several hours per day.
- Built end-to-end automation pipelines integrating Azure Durable Functions, Kafka, and Cosmos DB, eliminating hours of daily manual processing and reducing error rates across order and fulfillment workflows.
- Shipped Windows desktop applications using Tkinter and PyQt, enabling non-technical teams to self-serve complex operational workflows without engineering involvement, reducing support requests significantly.
- Engineered a production Python toolkit with structured logging, automatic retries, graceful error handling, and a self-update mechanism, requiring zero manual deployment and improving system reliability.
- Drove performance tuning across services, achieving measurable reductions in processing latency and support ticket volume.
- Built AppInsights Copilot, a zero-dependency Windows EXE bundling an MCP server with 116 diagnostic tools, enabling natural-language incident investigation via VS Code Agent Mode and GitHub Copilot, eliminating the need to write KQL queries.
- Recognized with three internal awards including Udbhavani Winner for Best Process Improvement, for high-impact automation that changed how the team operates.

Assistant Engineer | Tata Consultancy Services *Oct 2020 – Dec 2024*

Client: Meijer, Grand Rapids, MI · Bengaluru, Karnataka

- Designed and integrated core Azure services including Cosmos DB, Application Insights, Durable Functions, Logic Apps, and Service Bus, improving system reliability and enabling real-time observability across a large-scale enterprise cloud platform.

- Maintained and extended a SAP Hybris e-commerce stack serving millions of high-volume retail transactions, handling backend logic, storefront configuration, and Backoffice administration with zero critical downtime.
- Built CMS-managed landing pages and promotional content for high-traffic retail categories, coordinating directly with business stakeholders and consistently meeting campaign go-live deadlines.
- Used SQL and Azure Storage Explorer for data investigation and cross-system reconciliation, reducing average incident resolution time by streamlining root-cause analysis during production incidents.
- Delivered Power BI dashboards adopted by business teams to track KPIs, SLA compliance, and operational health metrics, improving visibility across departments.
- Presented live feature demos to business stakeholders, translated feedback into actionable improvements, and drove iterative delivery across multiple sprint cycles.
- Contributed across the full Agile delivery cycle including backlog refinement, sprint planning, daily stand-ups, stakeholder demos, and retrospectives, supporting consistent on-time delivery.

NOTABLE ACHIEVEMENTS

- Engineered AppInsights Copilot, a zero-dependency Windows EXE bundling 116 diagnostic tools, enabling natural-language incident investigation and eliminating KQL query writing entirely.
- Built end-to-end automation pipelines integrating Azure Durable Functions, Kafka, and Cosmos DB, eliminating hours of daily manual processing and reducing error rates.
- Recognized with three internal awards including Udbhavani Winner for Best Process Improvement, for high-impact automation that changed team operations.
- Delivered a self-hosted Indian stock market terminal with 15 institutional-grade technical indicators and GPT-4o AI chat, running locally with zero paid APIs.

PROJECTS

India Stock Dashboard — *Python · FastAPI · Vanilla JS · Canvas API · NSE/BSE · F&O · GPT-4o · GitHub Models*

- Self-hosted Indian stock market terminal with 9 tabs including live portfolio P&L, candlestick charts, NSE screener, F&O option chains, sector heatmap, FII/DII flows, mutual funds, and live news.
- Signal Scanner runs 15 institutional-grade technical indicators across Nifty 50, 100, Midcap, and sector lists, scoring each stock 0 to 100 with Strong Buy to Strong Sell verdict and ATR-based price targets. Indicators include RSI, MACD, Ichimoku, ADX, OBV, Bollinger Bands, Fibonacci, Parabolic SAR, Stochastic, and SMA 20/50/200.
- AI chat powered by GPT-4o for natural-language portfolio analysis and stock research, running locally with data never leaving the machine. Zero paid APIs.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) — Microsoft
- Google AI Professional Certificate — Google
- Gen AI E2 Certification — Tata Consultancy Services
- Confluent Developer Skills for Apache Kafka — Confluent
- MLT Runway, Key Leadership Roles Curriculum — MLT (Management Leadership for Tomorrow)

AWARDS

- Star of the Quarter (April 2022) — Tata Consultancy Services
- Udbhavani Winner, Best Process Improvement (2023) — Tata Consultancy Services
- Certificate of Appreciation — Tata Consultancy Services
- Special Initiative Award — Tata Consultancy Services

EDUCATION

B.Tech, Mechanical Engineering *2019*

JIS College of Engineering (MAKAUT), West Bengal
